Subject: Re: LBNL Old Town Demolition Project Wipe Sampling Results
Date: Wednesday, September 21, 2016 4:06:42 PM

Hi Carmen,

We appreciate your timely follow up.

If I may suggest and as we planned, we'll arrange to return the tanks to the supplier by the end of next week unless we hear otherwise from you in the meantime.

We look forward to our meeting next week.

Best regards,

Joe

Greetings Joe,

I received the wipe sampling results for the three tanks that contained stormwater from certain areas at the LBNL site and such water contained PCBs (as congeners) at 0.624 ug/L. According to LBNL, storm water that accumulated in areas at the site such as trenches, pits, and open excavations where PCBs were detected during site characterization was removed and stored in these tanks. Thank you for sending that information to us.

I have quickly reviewed the diagrams and summary of wipe sampling and PCB congener analytical results. At this moment, I do not have any concerns with the information that you provided. If that changes after I review the actual analytical laboratory (Cape Fear Analytical LLC) reports and validation report, I will notify you.

Thank you for your courtesies.

Best,

Carmen

Subject: LBNL Old Town Demolition Project Wipe Sampling Results

SENT ON BEHALF OF BOB CRONIN

Old Town Demolition Project Director

Facilities Division

Lawrence Berkeley National Laboratory

Dear Ms. Santos, Mr. Armann,

Attached please find a letter regarding results of wipe sampling of tanks that held captured stormwater from the Old Town Demolition Phase I project area.

The signed original of the letter and enclosures are also being sent to you via certified mail today.

Sincerely,

Nancy Sutherland
